

the Jennifer Steensen Field of Dreams Therapeutic Riding Program of Granger, IO. This outstanding program provides therapeutic riding and driving programs for individuals with physical and mental disabilities and children in at-risk situations.

The program has provided over 2000 hours of horseback riding lessons to clients aged two to 80 with disabilities that include cerebral palsy, intellectual disabilities, spinal bifida, blindness, ADHD, learning disabilities and brain injury. On average, 80 individuals participate in this program every year.

I would like to pay tribute to the dedicated volunteers who make this program successful. One such individual is Lisa Quam, who volunteers once a week at the stables to share her laughter and love of horses with the riders. Matthew Vujnovich of Des Moines is one of the many clients who have benefited from the time and talents of the program's volunteers. Matthew has autism and Lisa's friendship and guidance with the horses has helped develop his fine motor skills, muscles and independence.

I am dedicated to the principles of the Americans with Disabilities Act: equality of opportunity, full participation, independent living, and economic self-sufficiency for millions of Americans with physical and mental disabilities. The Jennifer Steensen Field of Dreams Therapeutic Riding Program advances these principles and helps clients develop critical life-skills. I applaud their efforts and thank them for all that they have accomplished.●

ZACH HEBL'S ACHIEVEMENT ON BEHALF OF PEOPLE WITH DISABILITIES

● Mr. HARKIN. Mr. President, as we all know, this is an election year. Whether you are a Democrat or a Republican, both parties recognize the importance of civic engagement this year. That is why I want to recognize the efforts of Zach Hebl, an Eagle Scout from Cedar Township, IA. When 15-year-old Zach learned that his parents' polling location was not accessible to people with disabilities, he coordinated an effort to construct a sidewalk, parking lot, and wooden access ramp at Cedar Township Hall, a Johnson county polling location, so that everyone in his precinct had an equal opportunity to cast their ballot.

Zach's achievement is particularly important because as of September of 2003, there were approximately 300 precincts in Iowa that did not meet the standards of the Americans with Disabilities Act. Without renovation, these locations will shut down in 2006 and close their doors to voters. Thanks to Zach, Cedar Township Hall was the first site to be removed from this list. I would like to print in the RECORD this article from the Cedar Rapids Gazette which describes Zach's project in great detail.

The article follows:

Cedar Rapids Gazette, August 26, 2003:

Fifteen-year-old Zach Hebl didn't want to see the one-room schoolhouse become just a symbol of the past.

The old schoolhouse, which closed in the 1950s, has served as the township's polling place for at least 60 years but was in danger of no longer being an allowable voting site because it failed to meet Americans With Disabilities Act, or ADA, requirements.

That's when Hebl got the idea to bring the old building up to current standards by building a ramp and deck onto the building.

"I've always figured I could be voting here one day and wanted to do something so that I could do that," said Hebl, who lives on a farm in Cedar Township about two miles south of the schoolhouse.

Hebl began working on the project, which he will use as an Eagle Scout project, in mid-April. He developed plans for multiple ramps and made a presentation to the Cedar Township Board of Trustees. He researched the ADA requirements and prepared cost estimates. By mid-July, both the Scouts and trustees approved the project.

"We were glad somebody came along to take this project over," said Don Brannaman, a trustee who has lived in Cedar Township for 55 years. "We were going to have to find a way to do this."

Hebl worked with his Eagle Scout adviser, Jim Jacob, 51, a structural engineer with Van Winkle-Jacob Engineering in Coralville, to conduct site elevations and choose the best design.

"This building has got a lot of significance," said Jacob, who lives in Cedar Township and has voted at the building since 1983. "If people couldn't vote here, nobody would take care of the building, and it would fall into disrepair."

On Saturday, it was evident many residents didn't want that to happen. A group of 25 kids, mostly fellow members of Troop 120, and 19 adults arrived at the job site to help build the 24-foot-long ramp and deck. Installation of the posts began Friday, and the final touch on the project, a large concrete parking slab and sidewalk to the ramp, will be installed in September.

"We wouldn't want to vote anyplace else," said Loretta Basten, 58, who attended the one-room schoolhouse until third grade when it closed in the 1950s. She was bringing snacks to the site.

"There are students who go to college and come back just so they can cast a ballot here," Basten said.

In August, Chet Culver, Secretary of the State of Iowa, and I had the privilege of attending a ribbon-cutting ceremony for the new polling place. There to support Zach were his parents, Boy Scout Troop 120, and many members of the community. It was a proud moment for Cedar Township as Zach cut that ribbon. He is a wonderful example of how one person can truly impact a community simply by acting upon an idea.

As the author of the ADA, I am always glad to see progress toward its four great goals—equality of opportunity, full participation, independent living, and economic self-sufficiency for individuals with disabilities. Zach's work is critical to ensuring equality in voting and full participation in our democratic system, which formerly was not available to the people in his County and still is not available for many Iowans. Even though Zach is too young to vote, he serves as a role

model to Eagle Scouts and young people across the country. He proves that one person can make a tremendous difference.●

HONORING LT. COLONEL JOHN MCCANCE, USAF

● Mr. MILLER. Mr. President, I rise today to pay tribute to Lt. Colonel John McCance, who will complete his 3-year tour of duty with the United States Air Force's Office of Legislative Affairs at the end of this year.

Most people don't know that our services have liaison offices within Congress. Even many servicemembers don't know these offices exist. And, yet, they are a vital link between the United States Senate and the Department of Defense.

Liaison officers are chosen because of their wealth of knowledge, ability to handle a pressure-packed environment with high-maintenance staffers, and their discernment in making tough decisions. They generally have significant experience and a long track record of outstanding performance. Simply put, Service liaisons are the best of the best.

The Air Force has been fortunate to have Lt. Colonel John McCance as a vital member of its liaison team here in the Senate. He has demonstrated the superior caliber and quality of Air Force officers with which we are all familiar. I know I speak for many of my fellow Members in expressing our profound regret at his departure. Yet I know that the Air Force Reserve has many good things planned for John and that our country will surely benefit from his experience in his future assignments.

On behalf of the Senate, I thank John McCance for his service to the Nation and to the United States Air Force Reserve, and I thank his wife, Wendy, and his daughters, Lauren and Katie, for their steadfast support while he fulfilled this essential duty. We in the U.S. Senate, and I personally, wish them all the best as Lt. Colonel McCance returns to his civilian career and tackles new challenges.●

TRIBUTE TO WAYNE BERRY

● Mrs. HUTCHISON. Mr. President, I rise today to take this opportunity to honor Wayne Berry from Dallas, TX, as he celebrates his 50th anniversary working for Lockheed Martin Missiles and Fire Control and its predecessor companies on November 3, 2004.

In 1954, at the age of 24, Mr. Berry began his career with Lockheed Martin as a machinist from Temco Electronics and Missiles. After graduating from the University of Texas at Arlington in 1968, he joined the Environmental Test Lab as an Environmental Test Technician. Over the next 38 years, Mr. Berry contributed significantly to the growth of the Environmental Test Lab and, for the past 10 years, he has been assigned responsibilities as Quality Engineering Project Manager.
